Instructions for Iron-On Soft 'n Stretchy Ink Jet Transfer Sheets for Light Fabrics

Soft 'n Stretchy Transfer Sheets for Light Fabrics are a transparent base material to be used on white or very light color fabrics. For optimal results, please read instructions carefully prior to use.

1. MATERIALS NEEDED

- Soft 'n Stretchy Transfer Sheets for Light Fabrics (included in the package).
- T-Shirt, garment or other project on which to apply the transfer. Works great with stretchy fabrics such as spandex, lycra, cotton, polyester and blends.
- Computer color ink jet printer.
- Ordinary household hand iron.
- Pillowcase.
- Smooth, hard, heat resistant surface, such as a wood cutting board for ironing. Do not use ironing board, glass or heat sensitive surfaces.

2. CREATE YOUR IMAGE

- Design your image on the computer using photos, graphics and/or text.
- "Mirror image" before you print. This may also be referred to as "Flip/horizontal" in your computer program's tools. Many printers offer "mirror image", "t-shirt mode" or "reverse mode" in their printer settings options.
- You may wish to test your final image by printing to a plain piece of paper first.
- Insert a single transfer sheet into your printer so that printing appears on the white, not the blue side of the transfer sheet.
- Print the image using the chart below as a guideline for your specific printer.
- Allow image to dry 30 minutes before transferring.
- Cut out image if desired. Trim approximately 1/4" from colored ink areas.

Printer	Paper Setting	Image Quality Setting
Lexmark	T-shirt Transfer	Best
HP DeskJet	T-shirt Transfer	Best
Canon	T-shirt Transfer	Default
Epson C86/C88	Plain Paper	Photo / Best Photo
Epson 1280	360 DPI	Photo / Best Photo
Epson R200	Photo-Quality inkjet	Photo / Best Photo
Epson 4000	Photo-Quality inkjet	Automatic

3. IRON APPLICATION

- Preheat iron to highest (cotton) setting. DO NOT USE STEAM. (Empty any water that may be in iron. Allow iron to preheat for five minutes).
- Place a pillowcase on smooth, hard, heat resistant ironing surface such as a wood cutting board. Do not use ironing board. Iron pillowcase, if necessary, to remove wrinkles.
- Pre-iron garment or project to remove any moisture and wrinkles.
- Position transfer image side DOWN on project surface.
- Using firm pressure, slowly iron over the entire surface with sufficient overlapping (1) side-to-side (2) bottom to top and (3) along the edge moving continuously for 2-3 minutes.
- Remove transfer backing paper immediately or when it cools.
- Depending upon the material used, a gentle pulling / stretching motion applied to the fabric after removal of the backing sheet may aid in the process of the transfer setting into the fibers.

4. LAUNDERING INSTRUCTIONS

- Wash and dry according to your fabric's normal washing instructions.
- After washing, transfer may be directly ironed on.

5. STORAGE

- Always store unused product in original package in a flat, cool, dry place.

This product is intended for use in standard ink jet printers only. Do not use in other printers or copiers such as laser printers or any other printer / copier that applies heat, as it may damage the machine. Test the product you plan to use to determine the suitability of the product for your equipment, methods and substrate material.
